
Building Instructions for the Raven eCCPM helicopter kits.

Introduction

Congratulations on your purchase of Century Helicopter Product's newest RC helicopter model. The Raven eCCPM is a new breed of helicopter, ideal for beginners new to the hobby through to expert pilots. In order for our helicopters to improve, we needed to provide higher value for a better price, but this needed revising. Our result is this kit you are about to start building, offering the best design and quality of the 30 and 50 class and including features commonly found only in more expensive kits. This kit will exceed your expectations for precision control at an affordable price.

Warning

This radio controlled model is not a toy! It is a precision machine requiring proper assembly and setup to avoid accidents. It is the responsibility of the owner to operate this product in a safe manner as it can inflict serious injury otherwise. It is recommended that if you are doubt of your abilities, seek assistance from experienced radio control modelers and associations. As manufacturer, we assume no liability for the use of this product.

Pre-assembly Information

Upon opening the kit, all the major component parts are bagged and numbered for ease of assembly which correspond to the sections of the manual. Various assemblies have been pre-assembled only requiring the final assembly and installation onto the particular part, screws and nuts required for each step are packaged in the same bag as the parts. Be careful when opening each bag as not to lose any hardware. Care has been taken in filling and packing of each bag however mistakes do happen, if there is a parts shortage or missing hardware please contact us at:
